Personal Projects

AskPDF – AI Powered PDF Chat Application

- Built an AI-based PDF chatbot using RAG (FAISS + Sentence Transformers + LLM via.
- Developed React-based ChatGPT-style UI with streaming responses and source navigation
- Implemented semantic search and PDF text processing for accurate question answering
- Built semantic search using Sentence Transformers and FAISS for accurate context retrieval.
- Integrated LLM via :contentReference[oaicite:0]{index=0} to generate contextual answers with real-time streaming responses.
- Implemented source tracking with page navigation (click jump to PDF page)
- Improved text quality by handling encoding issues and normalization.
- Developed full-stack architecture using React (frontend) and Flask (backend).

Heart Disease Prediction

- Developed a machine learning model to predict the likelihood of heart disease based on patient health parameters.
- Performed data preprocessing including handling missing values, encoding categorical features, and feature scaling.
 - Conducted exploratory data analysis (EDA) to identify patterns and correlations between medical attributes.
 - Implemented classification algorithms such as Logistic Regression, Decision Tree, and Random Forest.
 - Evaluated model performance using accuracy, precision, recall, and F1-score.
 - Optimized model performance through feature selection and hyperparameter tuning.

Technical Skills and Interests

Languages: C/C++, Python, JavaScript, HTML, CSS

Libraries/Frameworks: C++ STL, Python Libraries, React.js

Web Development Tools: Node.js, VS Code, Git, GitHub

Databases: MySQL, MongoDB

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object-Oriented Programming, Database Management Systems

Areas of Interest: Web Design & Development, Machine Learning

Soft Skills: Problem Solving, Self-Learning, Presentation, Adaptability
